

Dear Green Industry Professional:

Would it help your business to know more about pest and disease management? Join us for an in-depth look at problems that are occurring in local landscapes in late summer.

During this presentation and walk, we will examine pests and diseases of ornamental plants and turf close-up; review the biology of pests and diseases; discuss pest management; and review the latest recommended cultural control practices.

Professional representatives from Delaware Valley University and Lawn Care Association of Pennsylvania will cover insect, disease and weed issues on ornamentals and turf.

Keep Informed.....

If you can not attend this year's event, but would like to stay informed, join LCAP.

2019 Memberships are \$50.00 per individual
